Figure 1 – National Framework for Prevocational Medical Training

Prevocational doctors take responsibility for achieving the prevocational outcomes – with your support

Prevocational doctors are responsible for achieving the prevocational outcomes, with your support. This is a key part of their role and you will be expected to provide the necessary support to ensure they can meet these outcomes.

Prevocational doctors are responsible for achieving the prevocational outcomes, with your support.

Beginning-of-term discussion

At the beginning of the term, you will have a discussion with the prevocational doctor to discuss their progress and any issues they may be facing. This is an opportunity for you to provide support and guidance to the prevocational doctor and to discuss any issues they may be facing.

Prevocational outcome statements

Prevocational outcome statements

Prevocational outcome statements are statements that describe the expected learning outcomes of a prevocational placement. They are used to assess the student's performance during the placement and to provide feedback to the student. The statements are typically written in a clear, concise, and measurable format. They should be based on the curriculum and the specific requirements of the placement. The statements should be written in a way that is easy to understand and use by both the student and the supervisor. The statements should be written in a way that is easy to understand and use by both the student and the supervisor. The statements should be written in a way that is easy to understand and use by both the student and the supervisor.

Term assessments

Prevocational outcome statements

Prevocational outcome statements are statements that describe the expected learning outcomes of a prevocational placement. They are used to assess the student's performance during the placement and to provide feedback to the student. The statements are typically written in a clear, concise, and measurable format. They should be based on the curriculum and the specific requirements of the placement. The statements should be written in a way that is easy to understand and use by both the student and the supervisor. The statements should be written in a way that is easy to understand and use by both the student and the supervisor.

midterm assessment

Midterm assessment is a type of assessment that is used to evaluate the student's performance during the placement. It is typically used to provide feedback to the student and to identify areas for improvement. The assessment is typically written in a clear, concise, and measurable format. It should be based on the curriculum and the specific requirements of the placement. The assessment should be written in a way that is easy to understand and use by both the student and the supervisor. The assessment should be written in a way that is easy to understand and use by both the student and the supervisor.

end-of-term assessment

End-of-term assessment is a type of assessment that is used to evaluate the student's performance at the end of the placement. It is typically used to provide feedback to the student and to identify areas for improvement. The assessment is typically written in a clear, concise, and measurable format. It should be based on the curriculum and the specific requirements of the placement. The assessment should be written in a way that is easy to understand and use by both the student and the supervisor. The assessment should be written in a way that is easy to understand and use by both the student and the supervisor.

Improving performance

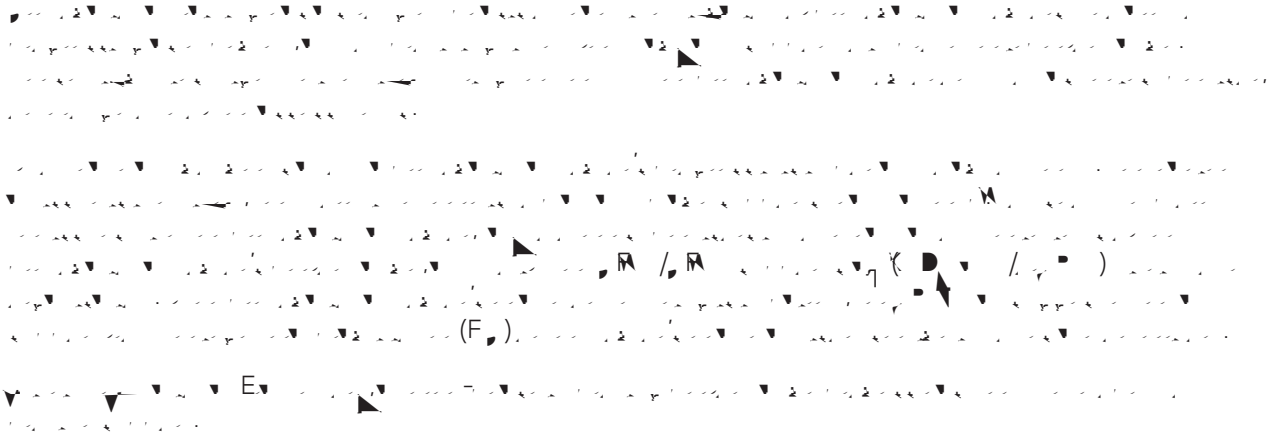

Figure 8: The improving performance process

PGY1 (Internship)

PGY1 (Internship) is a 12-month program designed to provide students with practical experience in the field of public health. The program is structured to allow students to gain hands-on experience in various public health settings, including government agencies, non-profit organizations, and academic institutions. The program is designed to be flexible, allowing students to tailor their experience to their interests and career goals. The program is a prerequisite for the PGY2 program.

PGY1 (Internship) is a 12-month program designed to provide students with practical experience in the field of public health. The program is structured to allow students to gain hands-on experience in various public health settings, including government agencies, non-profit organizations, and academic institutions. The program is designed to be flexible, allowing students to tailor their experience to their interests and career goals. The program is a prerequisite for the PGY2 program.

PGY2

PGY2 is a 12-month program designed to provide students with practical experience in the field of public health. The program is structured to allow students to gain hands-on experience in various public health settings, including government agencies, non-profit organizations, and academic institutions. The program is designed to be flexible, allowing students to tailor their experience to their interests and career goals. The program is a prerequisite for the PGY3 program.

PGY2 is a 12-month program designed to provide students with practical experience in the field of public health. The program is structured to allow students to gain hands-on experience in various public health settings, including government agencies, non-profit organizations, and academic institutions. The program is designed to be flexible, allowing students to tailor their experience to their interests and career goals. The program is a prerequisite for the PGY3 program.

PGY2 is a 12-month program designed to provide students with practical experience in the field of public health. The program is structured to allow students to gain hands-on experience in various public health settings, including government agencies, non-profit organizations, and academic institutions. The program is designed to be flexible, allowing students to tailor their experience to their interests and career goals. The program is a prerequisite for the PGY3 program.
